Fireplace & Stoves

Brass komerc Ltd. Banja Luka is a general agent and distributor of the company Fergus - the manufacturer of molded fireplaces and furnaces. ALL of our products comply with regulations and standards of the European Community, and they possess all characteristics of high-quality heating products. Our fireplaces and ovens are cast in sand moulds, making the surface a bit rough and therefore they emit heat a lot more efficiently and for a longer period of time. A minimal thickness of our mould is over 5 mm and therefore the heat is emitted better and for a longer period of time.

Our slogan is “OUR PRODUCTS LAST FOR A CENTURY”, meaning that our fireplaces and ovens can last up to a hundred years.

Cast parts of the ovens and fireplaces are coated with heat resistant paint made by a Spanish producer, and can resist up to 600°C.

Oven and fireplace parts are made of grey cast iron, and the door has SCHOTT heat resistant glass part, which can resist up to 700°C, making it possible to watch fire with a maximum heat distribution.

Our fireplaces and ovens don't use any kind of asbestine material.
